

Studying the star formation quenching in galaxies across cosmic time

1st year PhD student!

Annalisa Citro

Supervisor: Prof. Andrea Cimatti

Co-supervisor: Dr. Lucia Pozzetti

Analysis of high and low ionization lines and line ratios in order to study the **PROPERTIES** and the **EVOLUTION** of the underlying ionizing stellar populations

CATCHING GALAXIES IN THE QUENCHING PHASE

Comparisons between observed and modelled lines and line ratios are needed

CLOUDY!
